

Heatloss Analysis

Start using the power of thermographic images combined with state-of-the-art software. The Heatloss Analysis App is now available for partners with expertise in Europe. Start with large scale insulation campaigns at a fraction of the cost.

Large-scale projects & trained partners

Personalized insulation advice for a large number of residential houses by combining thermal images with AI technology.

Activate the energy transition

Show heat leaks and advice on how to improve the insulation status them including potential energy and cost savings. This increases the activation rate of homeowners.

Accurate detection & advice

The algorithms are validated scans of 100.000K+ houses in the Netherlands. The advice, and potential energy and cost savings are calculated together with partners in the energy sector.
